

“PAWN” Planter

Sheet code: *FICL012*

Drawing code: *AF16010502*

Revision: *23/01/2019*

Designer:
Bellitalia Design Department

Product: Circular planter model “PAWN”, composed by two elements and a central band. The lower planter is equipped with a **central integrated water drainage hole**.

Dimensions: diameter: 1200 mm;
height: 425 mm (variable);
total weight: 620 kg;
capacity: 176 litres.

Material: The planter can be manufactured using reconstituted natural marble stones, white granite or grey concrete conglomerate. Copper or stainless steel central band.

Reinforcing: The lower element is reinforced and fitted with bushes that permit its lifting. The upper element is also reinforced and endowed with bushes that permit its fastening through specific stirrups.

Finishing: The planter’s surfaces can be polished, to give the product a shiny effect, otherwise sandblasted or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. The copper band is painted with a protective coating for a durable shiny appearance, while the stainless steel band undergoes a satin finish treatment. All edges are rounded or made blunt.

Handling: Use appropriate equipment when handling.

Installation: Simply place the planter on the flooring.
