

**Max Dimensions:**

Height: 470 mm | Length seat: 1200 mm  
Length tot.: 1845 mm | Width: 500 mm | Weight of steel: 61 kg

**DESCRIPTION**

The bench/bike rack B CYCLE is made in steel 60/10 thickness. The seat, dimensions 1200x500 mm, is made in exotic hardwood 40 mm thickness, fixed to the structure in steel through specific screws. Through the laser-cut, on the structure of the seat a bike rack, provided with 2 plates 60/10 thickness, with a hole in the middle of 26 mm diam to hook the bike, is created. The feet of the bench B CYCLE are created from the same load-bearing structure, through two 90° folds on the extremities of the structure, leading to 2 profiles 50 mm deep, each one with 2 holes of 11 mm diam. for the fixing to the ground through specific bolts (not provided).

Steel EN10111DD11 is used for the realization of this product and all the elements in this material, after all the different stages (cutting, bending, welding), are treated with cataphoresis according to the UNI regulations and are later polyester powder-coated with RAL colours at choice. The wood used is either Iroko or Okume, treated with natural, water-repellent, UV ray resistant oils.
