## CROSSED CHAIR

Chair

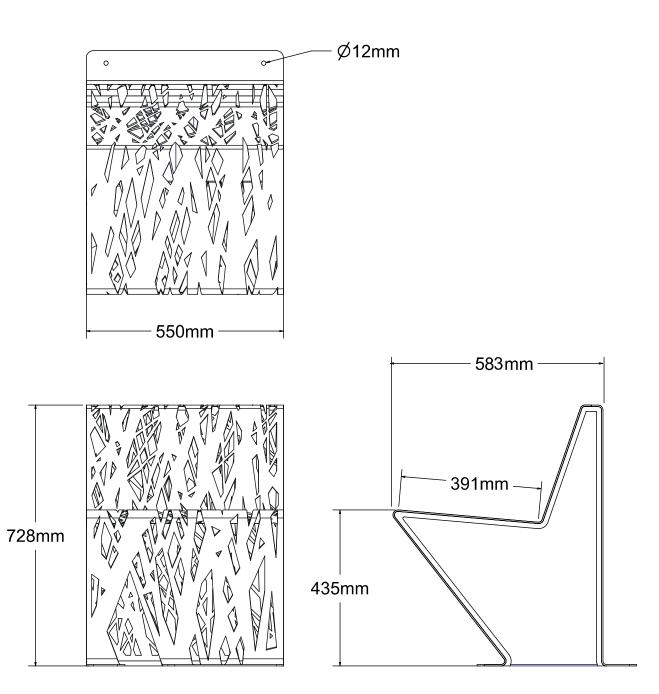

## **CROSSED CHAIR**

Chair

## Max Dimensions:

Height: 728 mm | Length: 550 mm | Width: 583 mm | Weight: 31 Kg

## DESCRIPTION

The CROSSED benches are made in steel of 60/10 thickness. The seat is characterized by a peculiar laser-cut texture, called CROSSED. Under the seat, 2 strong plates in steel (60/10 thickness) are welded. On the base of the bench there are 2 creases with 4 holes (12 mm diam.) for the fixing to the ground through specific bolts (not provided).
For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice. As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.
