

**Max Dimensions:**

Height: 1006 mm | Tube diameter: 40 mm | Length: 200 mm | Base: 300x120 mm

Weight: 6 kg

**DESCRIPTION**

The bike rack HOOK is made in tubular steel of 40 mm diam and 2 mm thickness. On the base of the bike rack there is a plate in steel sheet of 60/10 thickness, provided with 4 holes of 10 mm diam. for the fixing to the ground through specific bolts (not provided). Otherwise

there can be an underground extension of 250 mm, for the fixing with the appropriate cementation (in this case there is no base plate). For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice.

This product is also available in stainless steel AISI 316, on demand.

Optional: extension for cementation
