

Max Dimensions:

Height: 600 mm | Top diameter: 1200 mm | Bottom diameter: 440 mm | Weight: 41 Kg | Capacity: 132 Lt

**DESCRIPTION**

The planter CROSSED is made in steel 30/10 thickness. The upper surface of the planter is characterized by a laser-cut texture called CROSSED. On the bottom of the planter a drain pipe, made in tubular steel, section 16X2 mm, H 50 mm, is welded. Besides there are 4 holes 12 mm diam. for the fixing to the ground through specific bolts (not provided).

For the realization of this product, Steel EN10111DD11 is used and later treated with a cycle of sandblasting, cataphoresis and powder coating. Such cycle is meant to guarantee the protection of the painted products, in an environment of C4 corrosion class, as requested by the UNI regulations EN ISO 12944-2. The products are eventually polyester-powder coated with RAL colours at choice. As an alternative to steel EN10111DD11, the production in corten is also available, on demand. In this case the material is treated with a specific oxidation process.
