

Max dimensions:

Height: 410 mm | Width: 580 mm | Length: 1630 mm

**MATERIAL DESCRIPTION**

Fiber-reinforced composite material made of a polyester resin and marble powder particularly resistant to wear and to atmospheric agents. Scratches and accidental damages can also be easily repaired thanks to the appropriate kits (available on request).

Hypergranite is finally available in different colours.

The S-Planter container is made bending and continuous wire welding a steel EN10111DD1 sheet, T. 15/10. On the bottom there are two holes (12 mm diameter) for water drainage. On request these holes can be capped or can be inserted overflow tubes with 40mm height. After the different processes (cutting, bending and welding), the container is subjected to a treatment of galvanisation in accordance with relevant UNI standards and finished with polyester powder coating AkzoNobel with customisable RAL colour.
