

## “ICARO” Table with four seats

Sheet code: **PAAR0083**

Drawing code:

Revision: **22/01/2019**

Designer:

Bellitalia Design Department

**Product:** Table model “ICARO”, composed by a flat base, four seats, a central pillar and a table. The base, the pillar and the table are fastened through a thread bar M20 blocked on the top by a tapered element. The benches are fastened through centres squares, secured on the flat base.

**Dimensions:** diameter: 2400 mm;  
height: 850 mm;  
total weight: 2370 kg.

**Material:** The bench can be manufactured using reconstituted natural marble stones or white granite conglomerate. The tapered element is in stainless steel and the square centres are in black PVC.

**Reinforcing:** All concrete elements are reinforced and endowed with bushes that permit their handling and the benches' fastening through square centres, except for the table that has a go-through hole. All bushes are covered with a Bellitalia plate after the placement.

**Finishing:** All surfaces are sandblasted, except for the upper rim that can be polished, to give the product a shiny effect, or bush-hammered, for a rough appearance. Surfaces are then covered with a transparent anti-decay coating, or, upon request, with anti-graffiti products. All edges are rounded or made blunt.

**Handling:** Use appropriate equipment when handling.

**Installation:** Place the base on an opportunely levelled pit; place the benches, using the specific square centres; fasten the thread bar on the base, and insert the pillar and the table; finally place the tapered element.
