BENCH

The CURVO element is made of the continuous wire welding, then polished, of three steel sheets , thickness 50/10, then galvanized polyester powder coated (or Corten treated with an oxidation cycle). The seats are made of exotic multilayer wood, treated with natural waterproof oils. At the bottom of the structure it is

fixed, through a continuous wire welding, a solid steel profile thickness 50/10, then polyester powder coated (or Corten treated with an oxidation cycle), necessary for ground fixing with anchor bolts (not provided). On the upper part of the structure, in order to stiffen it, an iron rod is welded (diameter 10 mm).
